

I have filled several electronic support of RM-10783, RM-10782, and RM-10781. They all have merit.

Selling this to the some of the current Extra, Advanced, or General will be a hard thing to do.

My un-acted upon RM-10620 to more or less merge the Novices into the tech's with a merit service time should be addressed this issue as well as the merge the Advanced to Extra's under merit time so that simple and easy to follow band plans could be made use of!

The Getting back of the novices voice on VHF is also a must for local emegencys in 6 meters, 440 Mhz, and 2 meters. This is needed for local emergency responce under homeland security!

The National VEC proposal is a good ieda also! The Ideas must be merged to make into a solid workable change if need-ed!
